

**PRE-TRAINING OUTLET VISIT
& AWARENESS PROGRAM**

Awareness Program

A. Software and System Awareness

1. POS System Operation

- Every staff member logs in with their own username and password never share logins.
- Know the basic screens: sales/checkout, item search, discounts, returns, and reports.
- Scan items whenever possible instead of manual entry to avoid price/Item code errors.
- Confirm price and quantity on screen with the customer before finalizing.
- Know how to void a transaction, apply a discount, and process a return and who is authorized to approve each.
- Log out or lock the terminal whenever stepping away from the counter.
- Report POS glitches, freezes, or printer/scanner issues to a supervisor immediately rather than working around them.

NOTE: DEMO OF SYSTEM (POINT OF SALES MODULE)

2. Inventory Management System

- The inventory system is the single source of truth for stock levels physical counts should always match the system, not the other way around.
- Every product must have a consistent Item code /barcode; never create duplicate entries for the same item.
- Understand how to look up stock by item, category, or location (shelf/warehouse).
- Low-stock and out-of-stock alerts should be checked daily and acted on, not ignored.
- Any manual stock adjustment must have a documented reason (damage, loss, correction, etc.).

NOTE: DEMO OF SYSTEM (INVENTORY MODULE)

3. Stock In and Stock Out Procedures

Stock In

- Verify delivered quantities against the purchase order/delivery note before entering them into the system.
- Enter stock-in promptly (same day) so available inventory is accurate.
- Flag and separately record any damaged, expired, or incorrect items do not add them to sellable stock.

Stock Out

- Every stock movement out (sale, transfer, return to main store, write-off, internal use) must be recorded with a reason code.
- Stock transfers between branches/warehouses need both a "stock out" entry at origin and a "stock in" entry at destination.
- Never remove physical stock without a matching system entry this is the most common cause of inventory discrepancies.

NOTE: DEMO OF SYSTEM (INVENTORY MODULE)

4. Purchase and Receiving Procedures

- Purchase orders (POs) should be created and approved in the system before goods are ordered.
- On delivery, check items against the PO for quantity, condition, and correct item code before accepting.
- Record any shortages, overages, or damages on a discrepancy/goods-received note and notify the supplier or purchasing team.
- Only confirm "received" in the system once physical verification is complete this triggers stock and, often, payment processes.
- Keep supplier invoices and delivery notes matched to their PO and receiving record for audit purposes.

5. Sales and Settlement Process

- Every sale must be recorded through the POS no off-system or "manual" sales.
- At the end of each shift/day, settle the register: match system-recorded sales against actual cash, card, and other payment totals.
- Investigate and document any variance immediately; don't carry forward unexplained differences.
- Settlement reports should be reviewed and signed off by a supervisor or manager.
- Keep receipts, settlement slips, and reports for the retention period required by company policy.

NOTE: DEMO OF SYSTEM

6. Cash Management

- Start each shift by counting and recording the opening cash float.
- Cash drawers should be accessible only to the assigned cashier during their shift.
- Large cash transactions or refunds should require secondary approval.
- Count and reconcile cash at shift close before submitting it to the cash office/safe.
- Any cash shortage or overage must be reported and documented the same day never adjusted quietly.
- Follow company policy on cash drop procedures (removing excess cash from the drawer during a shift) to limit exposure

7. Reporting System

- Know how to pull the core reports for your role: daily sales, stock levels, purchase history, cash settlement, and variance reports.
- Reports should be reviewed regularly (daily/weekly/monthly), not only when a problem arises.
- Use reports to spot trends early slow-moving stock, repeated shortages, unusual voids/discounts, etc.
- Export or archive key reports per company retention policy for audits and historical reference.
- Flag any report that looks inconsistent with what you observe on the floor (e.g., system shows stock that isn't physically there).

NOTE: DEMO OF SYSTEM

8. User Roles and Access

- Access should follow the principle of least privilege: staff only get system permissions needed for their role (e.g., cashiers can't edit prices; only managers can approve large discounts or voids).
 - Each user must have a unique login — shared or generic accounts break accountability and audit trails.
 - Role changes (promotion, transfer, resignation) must trigger an immediate access update or revocation.
 - Sensitive actions (price changes, discount approvals, inventory adjustments, refunds above a threshold) should require manager-level access or approval.
 - Periodically review user access lists to remove inactive accounts and correct role mismatches.
- Data Accuracy and System Discipline

B. Outlet Operational Awareness

9. Daily Opening Procedures
10. Staff Shift Handover
11. Customer Service
12. Customer Complaint Handling
13. Food Safety and Hygiene
14. Kitchen Operations
15. Recipe and Portion Control
16. Cleaning and Sanitization
17. Daily Closing Procedures

C. SOP Awareness and Compliance

18. Understanding SOP codes and responsibilities.
19. Importance of following standardized procedures.
20. Employee responsibilities.
21. Management responsibilities.
22. Audit and compliance requirements.
23. SOP violations and corrective actions.

Pre-Training Program

1. Daily Outlet Operations Opening Procedure

Awareness will be provided regarding:

- 24.Outlet opening responsibilities.
 - 25.Staff attendance and readiness.
 - 26.Cleaning and outlet preparation.
 - 27.Equipment checking.
 - 28.POS system readiness.
 - 29.Cash float verification.
 - 30.Kitchen preparation.
 - 31.Stock availability checking.
 - 32.Daily operational briefing.
- .

2. Staff Shift Handover Procedure

The training team will explain the importance of proper shift handover. Topics include:

- 33.Cash handover.
- 34.POS transaction status.
- 35.Pending orders.
- 36.Inventory and stock handover.
- 37.Customer issues.
- 38.Equipment problems.
- 39.Special instructions.
- 40.Shift handover records.

3. Customer Service SOP

The awareness program will cover:

- 41.Customer greeting.
 - 42.Taking customer orders.
 - 43.Communication standards.
 - 44.Handling special customer requests.
 - 45.Service timing.
 - 46.Food delivery standards.
 - 47.Customer satisfaction.
 - 48.Professional behavior.
- .

4. Customer Complaint Procedure

Employees will be made aware of the standard procedure for handling customer complaints. The process includes:

1. Listen carefully.
2. Apologize appropriately.
3. Understand the issue.
4. Take immediate action where possible.
5. Inform the responsible manager.
6. Record the complaint when required.
7. Follow up with the customer.
8. Take corrective action.

5. Food Safety and Hygiene

The program will create awareness regarding:

49. Personal hygiene.
50. Handwashing procedures.
51. Food storage.
52. Temperature control.
53. Cross-contamination prevention.
54. Expiry date management.
55. Raw and cooked food separation.
56. Kitchen cleanliness.
57. Employee health and hygiene responsibilities.

6. Standard Recipe Management

Employees will be introduced to the importance of standard recipes. Key points include:

58. Standard ingredients.
59. Standard quantities.
60. Preparation methods.
61. Cooking procedures.
62. Presentation standards.
63. Food cost control.
64. Consistent taste and quality.

For Example

STANDARD RECIPE

Every menu item must have an approved recipe card, which must include:

- Item name and code
- Ingredients
- Ingredient quantity

- Preparation method
- Cooking procedure
- Cooking time
- Portion size
- Plating instructions
- Photograph/reference image
- Allergen information
- Food cost

No outlet may change an approved recipe without Head Office authorization.

KIT-005 RECIPE CARDS — REFERENCE SET

The following recipe cards apply the standard base-and-garnish method to the outlet's core curry dishes. Ingredient weights for items other than Chicken Curry are draft figures based on the same method and must be weighed, tested, and formally approved by Head Office / Kitchen Manager before use as the official standard portion, per KIT-005 and KIT-006.

KIT-005-R01 CHICKEN CURRY

Base: Chicken curry base

Ingredient	Quantity
Curry base (from packet)	80 g
Water (from broth)	80 g
Fresh cream / milk mix	20 ml
Butter	10 g
Chicken, cooked/par-cooked	40 g

Preparation & Cooking Procedure:

1. Open the packet.
2. Scoop 80 g curry base from the packet.
3. Add 80 g water from broth.
4. Add 20 ml fresh cream/milk mix.
5. Add 10 g butter.
6. Add 40 g chicken.
7. Add spice mix as per order
8. Stir for 1 minute.
9. Transfer to curry plate.
10. Garnish and serve.

- Cooking time:
- Portion size:
- Plating instructions:
- Allergen information:
- Food cost:
- Photograph/reference image: [Attach approved reference photo]

No outlet may prepare or serve any dish above using quantities other than those on the approved recipe card. Any variation must be submitted to Head Office for review before implementation.

7. Food Portion Control

The awareness program will explain:

65. Standard portion sizes.
66. Measuring ingredients.
67. Controlling food wastage.
68. Maintaining consistent serving sizes.

- 69.Relationship between portion control and food cost.
- 70.Relationship between portion control and customer satisfaction.

8. Kitchen Preparation and Cooking

Topics include:

- 71.Daily preparation planning.
- 72.Ingredient preparation.
- 73.Cooking procedures.
- 74.Order preparation.
- 75.Kitchen communication.
- 76.Food quality checking.
- 77.Food presentation.
- 78.Reducing food waste.

9. Cleaning and Sanitization

The pre-training program will cover:

- 79.Daily cleaning schedules.
- 80.Equipment cleaning.
- 81.Kitchen cleaning.
- 82.Dining area cleaning.
- 83.Toilet cleaning.
- 84.Sanitization procedures.
- 85.Cleaning responsibilities.
- 86.Cleaning checklists.

10. POS System Operation

The software awareness session will introduce employees to the POS system. Topics include:

- 87.Login and user access.
- 88.Opening the POS system.
- 89.Creating customer orders.
- 90.Dine-in orders.
- 91.Takeaway orders.
- 92.Delivery orders.
- 93.Modifying orders.
- 94.Canceling orders.
- 95.Applying discounts.
- 96.Payment and settlement.
- 97.Cash and cashless payment.
- 98.Bill printing.

- 99. Receipt printing.
- 100. Void and refund procedures.
- 101. Day-end procedures.
- 102. Basic POS reports.

11. Cash Management

The program will introduce:

- 103. Opening cash float.
- 104. Cash collection.
- 105. Cash verification.
- 106. Cash handover.
- 107. POS settlement verification.
- 108. Cash shortage and overage reporting.
- 109. Daily cash closing.
- 110. Bank deposit procedures where applicable.

12. Inventory Management

Stock In

- 111. Receiving goods.
- 112. Purchase verification.
- 113. Quantity checking.
- 114. Quality checking.
- 115. Recording received stock.

Stock Out

- 116. Stock issued from the main store.
- 117. Stock transferred to the outlet or kitchen.
- 118. Recording stock consumption.
- 119. Stock movement approval.

Inventory Control

- 120. Physical stock counting.
- 121. System stock comparison.
- 122. Stock variance.
- 123. Wastage recording.
- 124. Expiry date management.
- 125. FIFO/FEFO procedures where applicable.

13. Staff Management and HR

Awareness will be provided regarding:

- 126. Attendance.
- 127. Punctuality.
- 128. Staff responsibilities.

- 129. Leave procedures.
- 130. Workplace discipline.
- 131. Communication.
- 132. Employee behavior.
- 133. Role and responsibility clarity.

14. Staff Performance

The program will explain how employee performance may be evaluated based on:

- 134. Attendance and punctuality.
- 135. SOP compliance.
- 136. Customer service.
- 137. POS accuracy.
- 138. Cash handling accuracy.
- 139. Inventory responsibility.
- 140. Food quality.
- 141. Teamwork.
- 142. Discipline.

15. Equipment and Maintenance

Employees will be made aware of:

- 143. Daily equipment checks.
- 144. Proper equipment usage.
- 145. Reporting equipment problems.
- 146. Preventive maintenance.
- 147. Emergency equipment procedures.
- 148. Maintenance records.

16. Emergency Procedures

The awareness program will cover basic emergency procedures, including:

- 149. Fire emergency.
- 150. Gas leakage.
- 151. Electrical problems.
- 152. Equipment accidents.
- 153. Customer emergencies.
- 154. Employee accidents.
- 155. Emergency communication and reporting.

17. Daily Closing Procedure

The closing awareness session will include:

- 156. Closing sales verification.
- 157. POS settlement.

- 158. Cash verification.
- 159. Pending order checking.
- 160. Inventory and wastage recording.
- 161. Kitchen closing.
- 162. Cleaning completion.
- 163. Equipment shutdown.
- 164. Security checks.
- 165. Daily reporting.

18. Outlet Reporting System

Outlet employees and managers will be introduced to the reporting requirements. Reports may include:

- 166. Daily sales report.
- 167. Cash report.
- 168. Payment settlement report.
- 169. Inventory report.
- 170. Stock variance report.
- 171. Wastage report.
- 172. Customer complaint report.
- 173. Maintenance report.
- 174. Staff performance report.
- 175. Daily operational report.

19. SOP Compliance Audit

The pre-training awareness program will explain that outlets may be reviewed for SOP compliance. The audit may review:

- 176. POS operation.
- 177. Cash management.
- 178. Inventory management.
- 179. Food safety.
- 180. Cleaning.
- 181. Customer service.
- 182. Staff discipline.
- 183. Documentation.
- 184. Reporting.

20. SOP Violation and Corrective Action

Employees will be informed about the importance of following approved procedures. When an SOP violation is identified:

- 9. The issue will be identified.
- 10. The responsible employee or department will be informed.
- 11. The root cause will be reviewed.
- 12. Corrective action will be implemented.

13. Additional training may be provided.
14. Follow-up monitoring will be conducted.
15. Repeated violations may be escalated according to company policy.

- 185. Why SOPs are important.
- 186. Which SOP applies to each employee.
- 187. Employee responsibilities.
- 188. Documentation requirements.
- 189. Compliance requirements.

Step 5: Identify Training Needs

The training team will identify:

- 190. Employees requiring basic training.
- 191. Employees requiring advanced training.
- 192. System knowledge gaps.
- 193. Operational knowledge gaps.
- 194. SOP compliance issues.
- 195. Equipment issues.
- 196. Process improvement requirements.
